## PACKING

54×54×54mm / 6g

Flowerpot, Watertray, Case, Band

## USER GUIDE

Tear off the band

Flowerpot

Take out it

Water

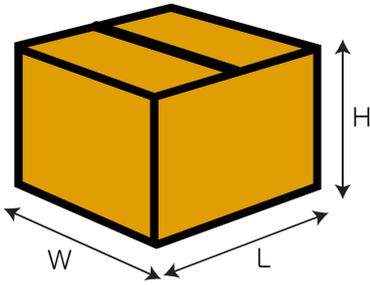

Slide out the cover

Care

1. Tear off the band. 2. Take out the flowerpot. 3. Pour 50ml water into the water hole. Do not spill on it. 4. Slide out the cover. There are kernels of seeds planted in it. 5. Keep it in a place of the constant temperature 20°C~30°C until sprouted. After sprouted, be sure to grow in the sunny place with good ventilation. Watering, generally fill the water basin once in every 10 days. It's important to keep water basin from being dry. Water shortages maybe cause of mold.

## PACKING

Carton Size	Cubicpot

## CUSTOMS

In importing of product with seed, as the exporter forwards required document (certificate of seed quarantine) together with product, the importer does not require reporting to their customs office separately. Upon arrival of the product at importer's customs office, it is forwarded to quarantine office and when seed is quarantined it is noticed to the importer. Comparing with general products, the product contains seed takes longer customs clearance time because of seed quarantine period (normally 3~4 days, however it may vary by country).
