Care

Transplant

1. Take out the contents underneath without the water tray. 2. Draw a picture with oil-based pens. And decorate your garden with stickers. If use water-based pens, the picture will be marred by water. 3. Assemble the puzzles. Insert the wall part into the ground, and then assemble the others. 4. Slide out the cover. There are kernels of seeds planted in it. 5. Pour 100~140ml water into the water hole. Do not spill on it. 6. Keep it in a place of the constant temperature 20°C~30°C until sprouted. After sprouted, be sure to grow in the sunny place with good ventilation. Watering, generally fill the water basin once in every 15 days. It's important to keep water basin from being dry. During the first month, keep 140ml. Water shortage maybe cause of mold.

72×48×52Cm	224 PCs / 25.9Kg	320 PCs / 26.7Kg

CUSTOMS

In importing of product with seed, as the exporter forwards required document (certificate of seed quarantine) together with product, the importer does not require reporting to their customs office separately. Upon arrival of the product at importer's customs office, it is forwarded to quarantine office and when seed is quarantined it is noticed to the importer. Comparing with general products, the product contains seed takes longer customs clearance time because of seed quarantine period (normally 3~4 days, however it may vary by country).
